XavSpace – Concept Note

Notice boards are an ideal platform that allows putting up of information required to be seen by everyone. Notice boards are often used in a variety of settings including schools, offices, government buildings, and even in homes. Notice boards serve the purpose of informing, warning and directing people to the right place for the right purpose. They are used in every college and university across the globe. Essentially, notices in the form of circulars, posters, charts, attendance sheets etc. are pinned up physically onto a board where students gather around to get notified.

XavSpace aims to replace notice boards at *St. Xavier's College (Autonomous), Mumbai*. It provides virtual Notice Boards that can be created by moderators. Notices can be posted on these boards by the staff. Each notice goes through an approval process, where a moderator can approve the notice or make / request an amendment to the same before it appears on the board.

Not all notices might require moderator approval. Notices that do not require approval can be posted on *unofficial* Notice Boards. These boards can be created by any staff.

Students can choose to follow boards of interest, to see the notices on their News Feed. Students can also use a mobile app to get notified immediately or choose to get notified via Facebook.
